

DFP

A Dover Group Company

**Taking Touch-Up
to the Next Level**

1-800-354-4445

Montreal (514) 420-6030

www.dfp.ca • dfpservice@dfp.ca

Dear Partner,

Dover Finishing Products Inc. (DFP) has been supplying the finest quality finishing and touch-up products to professional craftspeople for over half a century. In recent years, DFP has virtually redesigned its complete touch-up and repair product line. For example, we've combined more stable wax blends with deeper pigment and dye mixtures in our Fill Sticks. Our Pro Finish aerosols now incorporate pre-catalyzed formulations that have set a new industry standard in how spray lacquers should perform in terms of compatibility with other finishes, richness of colors and hues, application, flow and durability. Our touch up marker lines offer, not only, the benefits of our aerosol line, but a vast color selection making them a must in any production line, shop or touch up job. Last, but certainly not least, our Production Fill Stick line introduces an unparalleled blend of high product quality and amongst the most aggressively priced sticks on the market.

Despite our broad color offering, it is inevitable that, from time to time, exact matches are required and we are better equipped now than ever to produce any color in any of our touch up lines to meet your needs.

There are so many product developments that have taken place and that will continue to occur in the months and years to come. One of our greatest sources of frustration has been in trying to communicate these changes to you in a timely fashion. However, with the implementation of new technologies at DFP, we'll be keeping you up-to-date with postings

on our website and regular faxing and e-mails so that you'll never miss the newest product offering or one of our many planned specials.

Furthermore, we will continue to work diligently with you to ensure that our premium product line allows you to maximize your profits by delivering the right product for the job at the right price. Speaking of profits, our **Trade Secret®** line of touch up and care products is more extensive than ever, offering excellent margins for resale. It is also an extremely economical tool-of-the-trade. Whether used in shop and production line applications or as an after sale add-on, **Trade Secret®** products ensure that your jobs look great and stay that way.

While many changes have taken place at DFP, the one thing that's remained the same is our commitment to quality service. Our professionally trained staff is there to do more than just take orders. We'll help you when things go wrong and, more importantly, to avoid them from going wrong in the first place.

After 50 years, we've done a lot of things right, and they're about to get a lot better.

Rammie Kamal, General Manager

This is our home. Drop by and visit with our friendly and knowledgeable staff.

HOW TO ORDER

It's never been easier! Give us a call, fax, e-mail, snail mail, visit our web site or just come on by and order in person. To speed things up, call us to prepare your order for pick-up. Our goal is to ship in-stock items within 24 hours.

PRODUCTION FILL STICKS

Premium quality Fill Sticks at a fraction of the cost!

Unique "easy-fill" wax formulation makes this amazing stick a must in any factory, shop or touch-up application. Because of their low cost, this is an ideal repair kit component. Used to conceal small holes and gouges, fills open joint sections. Blended from high-grade wax that won't shrink. No heating or special tools are necessary. Simply rub in and wipe off excess. Can be finished over with lacquers, varnishes, enamels and other synthetic and catalyzed topcoats.

PRO FINISH CLEARS

The Convenience of spray cans and the strength of Pre-Catalyzed Finishes

Now you can produce professional finishes with the DFP Pro Finish sprays:

- The new pre-catalyzed formulation yields higher solids, greater durability and resistance to yellowing than conventional nitrocellulose-based finishes
- This system also offers higher compatibility with a wider variety of finishes in touch-up applications
- 11oz. (312g)

Clearer CLEARS and better build!

- Crystal clear finishes, less yellowing, great build!
- Offers even application, smooth flow out and excellent adhesion in various sheens

Super SEALERS laying down the foundation for beautiful finishes

- In order for your finishes to look their best, you need a barrier on the wood that has a good build and leveling properties while being easy to sand
- Water clear sealers all provide a superb base for toners and clear finishes

SILICONE STOPPERS

Help ensure that you only find fish eyes on fish!

Our fine line of Silicone Stopper sprays minimizes the need to strip and refinish jobs infected with silicone, saving precious time and money in the process. Silicone levelers, available in the 3 most popular sheens, neutralize infected finishes and build layer upon layer of smooth, clear, fish-eye free top coat. Do not top coat with any other finish.

Code	Description
768560	Silicone Stopper — Gloss
768564	Silicone Stopper — Satin
768562	Silicone Stopper — Flat

BLUSH STOPPER

The blush stops here!

Humidity leading to unsightly blushing within finishes is an extremely common occurrence in many shops. Dover Finishing System Blush Stopper allows trapped humidity to escape from finishes leaving you with a beautiful clear and blush-free finish. Blush Stopper can also be used to level orange peel and overspray allowing the finish to become smooth.

Code	Description
768555	Blush Stopper

BURN-IN SEALER

You don't have to be as bright as a new penny to use Burn-in Sealer on all of your delicate repairs

Burn-In Sealer reduces bright spots or halos resulting from finishing on top of repairs involving burn-in sticks. Burn-in repairs are tricky enough, but with burn-in sealer, the repair blends in with the surrounding finish. A must in all burn-in repair situations!

Code	Description
751492	Burn-In Sealer

Custom Matched Aerosols

We can custom blend aerosols to match any color you need.

QUICKWOOD EPOXY REPAIR PUTTY

Repair, rebuild or restore anything made of wood

Easy to use. Quickwood is a two part epoxy system . . . simply cut off the amount to be used and knead until uniform color is achieved. Apply to damaged area and smooth top surface. Can be drilled, sawed, carved, sanded, stained or painted. The ideal problem solver for the woodworker. Perfect for on-site work.

- Uniquely packaged in small cylindrical shaped tube

Code: 640200

WATER BASED WOOD PUTTY

Doesn't shrink or react, unlike solvent based putties, when coated with lacquers or other coatings

Totally stainable and paintable. Gives a hard, flawless finish. Hides nail holes, cracks and knots.

- Textured and pliable material
- Non-flammable, contains no acetone or other flammable or toxic ingredients
- Thin with water to rejuvenate, eliminates waste
- Adheres to all woods, chipboard, drywall, nail heads, screws, glass, fiberglass, plastic or metal

Code	Size
64008—(color)	125 ml (4.2 oz.)

3M SANDING SPONGES

These flexible foam sanding pads are superb for applications involving contoured areas. The aluminum oxide material offers a good cut rate and life in wet or dry sanding situations. Helps to reduce stress on fingertips.

- Pressure distribution prevents fingermarks
- Since there is no abrasive on the foam edge the sponge will not scratch mouldings when sanding adjacent panels
- 20/box

TACK CLOTH

Removes dust, dirt and sanding residue

Specially treated cheesecloth cleans any wood, metal or plaster surface of dust, dirt and sanding residue. Provides a smooth, blemish-free finish. Always soft and tacky—guaranteed never to harden or dry out. Compatible with all paints. Spontaneous combustion proof. Use after all sanding operations.

- Anti-static, non toxic
- Wax and silicone-free

Code	Description
700090	Sheet 18 x 36" (sold per dozen)
700091	Roll 36" x 150 yd.

SCOTCH BRITE

For polishing, finishing, cleaning, blending, deburring

Won't rust or discolor work.

Roll Size: 4" x 30'

Hand Pad: 6" x 9"

Type A—Maroon

For all-round cleaning and finishing. Removes rust and corrosion. Scuffs surfaces prior to and between paint coats.

Fine: Equivalent to #1 steel wool. Use with removers when stripping paint and varnish

Very Fine: Equivalent to 1/0 steel wool. Smooths and polishes

Type F Super Fine—White

Extremely fine abrasive used to buff and polish high gloss finishes. Finer than 2/0 steel wool.

Type S Ultra Fine—Gray

For fine cleaning and finishing. Final top coat rubbing, repairing satin finishes. Equivalent to 1/0 steel wool.

Code	Type	Format
700101	A Fine	Roll
700100	A Very Fine	Roll
700121	A Very Fine	Hand Pad
700102	F Super Fine	Roll

700120	Medium Duty	Hand Pad

CLOTH WIPERS

Polishing Cloth—147

White, soft material—65% cotton/35% polyester. For buffing and polishing.

Cheesecloth—148

The finest grade close-mesh cheesecloth available. Bleached and washed to give maximum absorbency. For staining, glazing, buffing. 100% cotton.

Econo Polishing Cloth—151

A superb 100% cotton cloth that provides an economical alternative in polishing and cleaning applications.

Staining Sponge—152

The ultimate in stain application. This specially designed sponge with terry cloth exterior uses superior absorption to ensure stains apply smoothly and evenly. Greater absorption also means that it lasts longer than regular cloths and can be re-used (for the same colour) time and time again. Can also be used in French padding applications.

Code	Model	Description
641155	147	Polishing Cloth*
641160	148	Cheesecloth*
641156	151	Econo Polishing*
641151	152	Staining Sponge

*Minimum order: 5 lb.

RUBBING COMPOUND

For high-gloss finishes

Abrasive paste used for rubbing down the final coat of lacquer and most finishes after spraying or brushing. Removes minor surface imperfections and overspray on spot repairs. Usually follows wet or dry sanding with fine sandpaper and rubbing lubricant. Best results when used with a soft cloth or buffing wheel. A natural color compound universally used on all shades. **Size:** Quart

Code	Color
680401	Natural

GEL LUBRICANT RUBBING MATERIAL

Excellent for removing packing marks

Concentrated paste used in conjunction with steel wool or scotch brite abrasive pads to smooth finishes, removes overspray, packing marks and fingerprints. Finishes may be rubbed to a high sheen or satin lustre, depending on grade of steel wool or abrasive pad used.

- Water soluble, no added costs for solvents or oils
- No clean-up necessary, simply wipe with a clean, dry cloth
- Contains no silicones, non-toxic

Rubbing Procedure: Use a small amount of concentrated paste on a 4/0 steel wool or Scotch Brite Type F Super Fine and apply to the finish surface by rubbing in the direction of the grain. Apply firm, even pressure in alternating strokes with the steel wool or Scotch-Brite, using a Felt Pad to steady your hand. Mix 1 part Gel Lubricant Rubbing Material with 4 parts warm water to make a solution or use convenient Pre-Cut Liquid Gel Lubricant Rubbing Material—16 oz. bottle with self dispensing cap.

Code	Description
680360	Concentrated Paste – Qt.
680361	Concentrated Paste – 1 gal.
680362	Concentrated Paste – 5.28 gal. (20 litres)
680350	Liquid Lubricant Rubbing Material – 16 oz.

BUFFING COMPOUND

For super high gloss finishes

The final step for obtaining that popular super high gloss finish. Used after wet sanding and the application of regular rubbing compound. Super fine abrasives polish the finish either with an automatic buffing machine or by hand. A must to create that “wet look” on new pieces or that “new look” on old pieces.

Size: 16 oz.

Code	Color
685105	Natural

LACQUER & PAINT STRAINERS

Filters undissolved particles and impurities

- Filters undissolved particles and impurities from lacquers, stains, enamels, urethanes and paints
- A must for the finisher who mixes stains and shading lacquers with Concentrated Lacquer Tinting Colorants and Universal Colors

Code	Quantity/Bag
670000	250

WAX-OFF

Removes wax, oil and polish from the finish prior to patching or recoating. Excellent cleaner to remove sticky buildup of furniture polish and wax prior to repolishing. A must for the furniture refinisher. Simply wipe on in a circular motion with a clean cloth. Remove after a few moments with a fresh clean cloth.

Code	Size
777103	125 ml
777101	1 litre
777100	4 litres

RUBBING LUBRICANT

Low viscosity liquid used for wet sanding touch-ups and spot repairs.

- Eliminates the use of heavy rubbing oils that have a tendency to be sticky and greasy
- Easy clean-up
- Adapted to rubbing operations with pumice stone and rotten stone

Code	Size
791152	125 ml
791151	1 litre
791150	4 litres

NU-GLAZE STAIN

Accents the grain and gives a contrasting effect around carvings. Slow drying stain, 30 minutes to 1 hour. Nu-Glaze is usually left on heavier around carvings. Must be applied over an existing finish. Not recommended for use on bare wood.

Color	No.	Code

FRENCH FINISHES

LAC-FRENCH
Light Amber Color

The yardstick by which all other french padding finishes are measured. Used by thousands of professionals for years. Instant dry, may be re-coated with lacquer immediately. Light amber color allows it to be used on the lightest of finishes. Ready to use, no oil or any other additives required. Dries harder than any other French padding finish on the market. Excellent build-up with hard resistant gloss finish.

- For best results use with No.147 polishing cloth and DFP Match & Blend powders for color

Code	Size
777000	1 Litre
777005	125 ml

WIL-PRO
Pale Amber Color

Super fast dry. May be top coated with lacquer immediately. Lowest build-up of any french finish on the market. Excellent where clarity and minimum build-up are critical. Fingerprint resistant. May be used on the very lightest of finishes with no discoloration. Ready to use, no oil or any other additives required.

- Apply with No.147 polishing cloth and DFP Match & Blend powder stains for padding in all repairs on burn-ins

Code	Size
777010	1 Litre
777015	125 ml

SATINOL
Amber Color

Formulated to dry to low sheen. Works well on all medium-light to dark finishes. Not recommended for very pale or natural finishes. Dries to a sheen like any other french finish, but will buff to a low lustre with 4/0 steel wool. Will stay dull. Ready to use; no oil or other additives required. May be top coated immediately.

- For best results use with No.147 polishing cloth and DFP Match & Blend powder stains for color

Code	Size
777020	1 Litre
777025	125 ml

TWO MINUTE TOUCH-UP

Fast drying clear lacquer base liquid for use with DFP Match & Blend powder stains to touch-up small areas. Works well for touch-up on sanded through edges, minor color discrepancies on burn-ins, etc. May be lacquered over immediately if desired. Commonly used as a base material for production line patching. Use with ¼" or ½" ox hair brush for best results.

Two Minute Touch-Up Solvent

Formulated for reducing two minute touch-up lacquer. Excellent for brush clean-up.

Code	Description	Size
777030	2 Minute Touch-Up	1 Litre
777035	2 Minute Touch-Up	125 ml
777040	Solvent	1 Litre
777045	Solvent	125 ml

DFP Match & Blend Staining Powders set the new industry standard in bold and vibrant pigmented systems.

Please see page 16 for more details.

THE ULTIMATE REPAIR KIT

Everything you will ever need for touch up repair

As good as the name implies, the components of the Ultimate Repair Kit have been painstakingly chosen in order to provide you with all of the tools you will ever need for virtually all touch up applications. Can be used in the shop or a work bench or easily transported into the field for work on location.

Contents*

MATCH & BLEND STAINING POWDERS

New base and primary color system allows you to create all of the colors of the spectrum without carrying excess stock. Highly refined powders are made up of blends of concentrated colors that are intermixed and put through a triple grinding process. Works equally well for french patching, distressing, graining and edge touch-up in conjunction with Wil-Pro, Satinol, Lac-French, 2 Minute Touch-Up and Graining liquid. Match & Blend powders will not change color on the patch.

BURN-IN STICKS

Made from the finest resins to provide the richest blend of pigments for those serious surface repairs. Avoid specks in tough table top and other surface repairs. Blended to offer non-lifting or raising when topcoated with most finishes including lacquers and synthetics. Apply to bare wood, on sealer, between topcoats or as a final patch. Easy melt and superior flow and superior resins ensure smooth, accurate burn-in repairs where second best just isn't good enough.

55-piece Master Burn-In-Stick Assortment Kit

Representing virtually all of the major woods, ensures that you're ready for practically any burn-in repair; boxed for easy viewing and selection. 2" sticks. **Code:** 790988

776153	Dark Brown	3
776154	Oak	4

DISTRESSING PENCILS

Excellent for applying distress marks under topcoat, colouring up minor defects, graining in patches, etc.

- Paper wrapped with a string, pull to eliminate sharpening
- Must be topcoated

Code	Color
776101	Brown
776105	Black

TRANSPARENT GRAINING LIQUID
For applying simulated grain to patches

Balanced formulation designed to be used in conjunction with DFP Match & Blend stain powders to match the grain lines. Bites into the finish without removing any color.

- Stays wet on brush long enough to allow you to work without repeatedly dipping the brush

Code	Size
777110	1 litre
777111	100 ml

PATCHING LUBE

Absorbs heat from the knife, protects the finish

Protective balm used in conjunction with burn-in stick repairs. Cuts down the danger of burning the finish when passing the knife over the patch. Prevents excess burn-in stick from sticking to the surrounding area making removal of any surplus easy. Allows you to make a quality patch with a hotter

Code	Size
791102	4 oz.
791101	Quart

CONCENTRATED UNIVERSAL COLORANTS

Highly concentrated pigments ground into a fine paste which are used to alter stains and coatings.

- Tints all lacquers, varnishes, acrylics, alkyds, oil and mineral spirit based stains and oil paints with the exception of water, alcohol and spirit varnish based products
- Not recommended for creating opaque colors
- Drying properties will be affected when used in excess

BURN-IN SUPPLIES

[A] Electric Burn-In Knife

Portable and lightweight. Quick heat up time, remains constantly hot while plugged in. Temperature can be regulated by lengthening the distance of the blade from the heat source. Standard blade has been shaped on one side with a chisel edge for removing excess material or grooving in open grain.

Code: 791215

[B] Curved Blade Knife

Curved flexible high grade steel burn-in knives. Can be used in those difficult areas such as moldings, small carvings, curved legs, saddle-seats, etc. Used in pairs—one is always heating while the other is in use.

Code: 791205

[C] Patching Knife

Professional tool made of the finest quality carbon tool steel; surface ground on both sides and on the end. Solid hardwood finished handle. Knives are well balanced and retain heat longer than others. Used in conjunction with Patch Lube and Electric Knife Heater. Used in pairs, one is always heating while the other is in use.

Code: 791200

SABLE HAIR BRUSHES

For graining, spot touch-up and detailing

Finest selected red sable. Natural tips hand cupped to long, slim-tapered, split-proof point. Rustproof aluminum seamless ferrules firmly attached to hardwood handles. Excellent for applying stain to appear as a grain after French Polishing.

- Needle-sharp point achieved by twisting tip while in motion for extra fine graining

Code	No.	Hair Length

* 2 ea. #1, 3 ea. #2, 3 ea. #3, 2 ea. #4, 1 ea. #5, 1 ea. #6

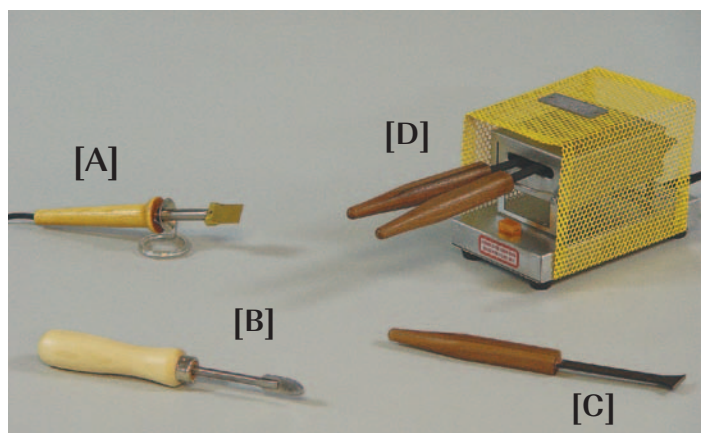

OX HAIR STROKE BRUSHES

For edge detailing and large patches

Finest light ox hair. Natural tips hand cupped to straight, square edge.

- Rustproof nickel plated ferrules firmly attached to hardwood handles
- Used for patching medium to large sections

Code	Size	Hair Length
783100	1/4"	1 3/16"
783105	1/2"	1 5/16"
783110	3/4"	1 3/16"
783115	1"	1 1/2"

[D] Electric Burn-In Knife Heater

Designed to heat burn-in knives in pairs—one is always heating while the other is in use. Temperature remains constant. Heater is accessible from both ends for multiple knife use (up to 4). Knife support bar prevents you from placing the knife too far inside, avoiding damage to knife handles.

Code: 791220

PERSONALIZED TOUCH-UP SYSTEM FOR WOOD

Fills, stains, finishes and seals damages

Reduce the headaches of returns while helping your dealers impress their customers with a color matched Touch-up System. Returns are costly and eat up profits. Our kits have been specifically designed and engineered for easy use by consumers, installers and delivery personnel. Instead of paying the high shipping costs incurred from bringing back damaged goods to your plant for repairs, why not send an inexpensive Color Matched Touch-up System and let your customer correct the imperfection. Every kit has a personalized label with your company name and color identifier.

Ultimate Touch-up System for Wood

This great looking kit will grab your customer's attention. Reusable clamshell packaging stands alone on a counter or shelf and can also be hung. Includes 1 each: Production Fill Stick, Factory or Pump Touch-up Marker, Crystal Clear Finish with brush in cap, complete instructions.

Jiffy Mailer Touch-up System for Wood

Includes 1 each: Fill Stick, Factory or Pump Touch-up Marker and complete instructions. Ready to mail in a heavy-duty padded envelope.

- Option 1:** Standard colors for all products
Minimum: 24, 36, 72, 144
- Option 2*:** Custom Production Fill Stick, Standard Production Marker, Crystal Clear Finish
- Option 3*:** Custom Pump Marker, Standard Production Fill Stick, Crystal Clear Finish
- Option 4*:** Custom Production Fill Stick, Custom Pump Marker, Crystal Clear Finish

* Minimum: 72, 144

PERSONALIZED FURNITURE POLISH & CLEANER

Inexpensive ads—furniture polish with your name on it

Having your very own furniture polish means you can attract more customers without paying high advertising costs. This is the same polish that we've provided leading furniture manufacturers and refinishers for years. Great door opener; customers will come back for more.

- We will custom print your company name, address and phone number as well as your selling price on a professional looking label

Minimum order: 80 bottles

Code	Size
685230	225 ml
685235	450 ml

FURNITURE POLISH AND CLEANER

Guaranteed to give a beautifully even lustre on furniture, pianos and woodwork. Used by leading manufacturers for years, this specially formulated polish and cleaner protects finished surfaces against water spills, dryness and ordinary wear. The silicone, wax and acid-free blend of gentle cleaners, removes dust, fingerprints, smudges and leaves behind a fresh finish. The final touch to any production or repair procedure.

SCRATCH REMOVERS

For Dark or Light Wood

Oil-based polish with staining action to hide minor defects on furniture, floors, paneling and other finished wood surfaces. Camouflages scratches and scuffs from abrasion. Excellent clean up and restoration polish with no wax or sticky build-up. Protects against spills and prevents cracks. Used by manufacturers, antiquaries and refinishers to hide residue around carvings after rubbing. Silicone-free formulation will not discolor. A quick, effective and inexpensive touch-up tool for manufacturers, installers and movers. For Dark Wood: Recommended for walnut, mahogany and dark woods. For Light Wood: Recommended for maple, pine and light woods.

641215	Large
641216	X-Large

SILICONE-FREE DRY LUBRICANT

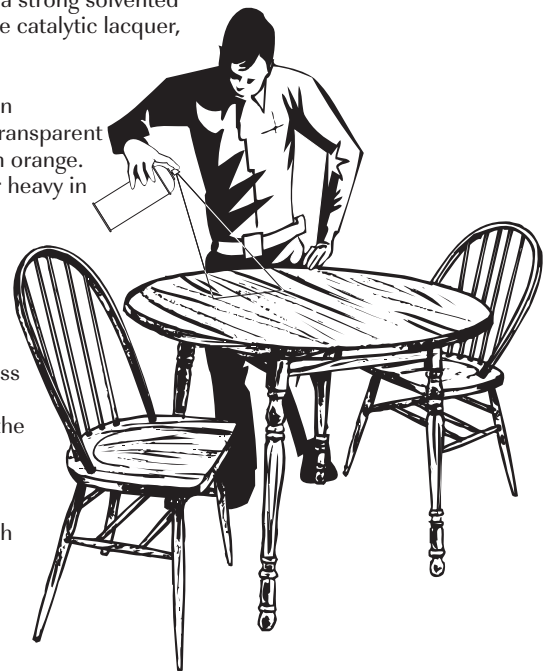

The most efficient and safest lubricant for shop environments

Dry Lubricant creates a clear, greaseless and dry film that offers excellent adhesion in metal, wood and rubber lubricating applications. Unlike most lubricants, Dry Lubricant contains no silicone. Treat your tools and other sticky areas with Dry Lubricant and avoid the threat of "fish eyes" from silicone infection in obtaining smooth sliding between surfaces.

Code	Description	Format
768550	Dry Lubricant	13 oz. aerosol can

- Adhesion:** The property causing one material to stick to another
- Barrier Coat:** A coat applied which separates the substrate from contact with the topcoats
- Bleeding:** When a dye or color absorbs through to the top layer. This is due to a common solvency of the topcoat and the dye
- Bloom:** A bluish haze of a film usually caused by insufficient drying time of the oil stain before topcoating
- Blushing:** A white, milky cast in a film which is caused by trapping moisture into the film. Blushing can be prevented and eliminated by slowing down the drying of the coating by adding a blush eliminator
- Blush Retarder:** A reducer with slower drying properties
- Body:** The thickness of viscosity of the coating while in liquid form
- Bond:** The adhesion of or ability of two items to stick to one another
- Bridge:** When a finish forms a layer over a crack or void
- Burn-In:** Method of filling a defect in wood using a hot knife and a burn-in stick
- Coat:** The act of applying a coating to a surface
- Coating:** Any material applied to a surface leaving a protective layer on that surface, e.g. lacquer, polyurethane, vinyl, acrylic, butyrate and shellac are all types of coatings
- Cold Checking:** The cracking of a finish due to exposure to cold temperatures
- Crawling:** When a coating applied tends to flow away from areas leaving them uncoated. This is usually caused by grease or oil contamination of the surface to be coated
- Delaminate:** The separation of layers due to lack of adhesion
- Distressing:** Fly speck spotting on finished surface
- Dye:** A coloring material that dissolves in a system very transparent and not as color fast as a pigment
- Dry Hard:** The elapsed time at which a coating has reached its optimum hardness
- Fading:** The loss of color due to exposure to sunlight
- Fast to Light:** A color which is not significantly affected by exposure to sunlight
- Fish Eye:** Pock marks or craters that show up on finished surface when silicone is present. This condition is caused by lacquer pulling away from the surface on which silicone base polish has been used prior to the lacquer application
- Flash Point:** The temperature at which a material will ignite when exposed to a source of ignition
- Flood:** The act of very heavily applying a coating to the substrate
- Flow:** The smoothing and leveling out of a coating
- French Polish:** A shellac base coating which is applied by manually "padding" it onto the surface
- Glaze:** An oil based pigment which is applied between lacquer coats to accent or give a graining effect
- Gloss of Sheen:** The shininess or reflectability of a surface
- Holiday:** An uncoated area of a coated surface usually missed unintentionally
- Incompatible:** Used in reference to coatings and/or stains which are not capable of being mixed with one another
- Leveling:** The act of applying a coat which will smooth out a previously rough (orange peeled) coat
- Lifting:** The softening and repenetration of a previous coat resulting in anything from an "orange peel" to a "stripping" effect. This is usually caused by applying a strong solvent coating over a curing type coating (curing type coating would be catalytic lacquer, urethane lacquer, polyurethane and enamels)
- Non-Volatile:** The solid material which is left after total solvent evaporation
- Nitrocellulose:** The primary material which is left after total solvent evaporation
- Opaque/Opacity:** The degree of hiding of a pigmented coating. The opposite of transparent
- Orange Peel:** A rough surface of a film similar in appearance to the skin of an orange. This is usually caused by spraying a material that is too thick or heavy in viscosity
- Pigment:** A finely ground, insoluble powder which contributes color to a coating; usually very color fast
- Pinholing:** The appearance of numerous small holes in a film, usually caused by bubbles due to heat drying of the coating
- Primer:** A coating which is first applied to a bare surface
- Reducer:** To add solvent in order to thin a material to a workable thickness (viscosity)
- Sanding Sealer:** A lacquer formulated to give better filling and sandability than the topcoat lacquer
- Substrate:** The surface or material to be coated
- Transparent:** Clear enough to see through
- Translucent:** Allows light to pass through but not clear enough to see through
- Viscosity:** The thickness of a coating material in its liquid form
- Volatile:** The solvent portion of a coating
- Washcoat:** Very thin coat of shellac or sealer
- Water White:** A term used to describe the color of a coating in its liquid form (water white meaning as clear and colorless as water)

BUMPON™ PROTECTIVE PRODUCTS

Cushions against nicks, scratches, scuffs, vibration, slipping or noise

Self-sticking bumpers made of a durable, resilient polyurethane polymer serve as high performance cushioners, feet, spacers and protectors. No need for screws, glue, rivets or holes of any kind. Aggressive, high tack pressure sensitive adhesive protected with an easy release liner makes application fast and easy. Won't dry out, crack or mar surfaces as will rubber.

Sticks directly to office equipment, household appliances, cabinets, walls, store displays, sliding doors. Cushions the bottom of blenders, lamps, desktop accessories, and electronic cabinets to raise and level units.

FUJI HVLP TURBINE SUPER PRO™ SPRAY SYSTEM

Reduces overspray by up to 80%

Complies with the strictest environmental protection regulations. High volume, low pressure turbine powered spray systems provide the quality of finish identical to the best high pressure systems without the need of a compressor. The turbine produces a continuous supply of warm air eliminating moisture and oil contamination that plagues high pressure systems. Fingertip spray pattern control adjusts from 14" vertical pattern to 1/4" round pattern. Fluid adjusting screw reduces quantity of paint material for airbrush applications. Compact; may be taken to the job site.

FUJI MODEL # Q3 pro™ HVLP TURBINE SYSTEM

The Fuji Q3™ system is packed with new features - first of all - it's quiet! Noise has been reduced to less than 1/2 of the previous Super Pro model. There is nothing like it available at this price. The 3-stage Ametek-Lamb motor is still the most powerful in its class. For years, users have complained about the stiffness of the plastic air hose, we have now switched to the new Fuji Hi-Flex™ Rubber Hose - no more fighting that hard plastic hose! The Fuji Q3™ is designed for heavy-duty use in all fine-finishing applications including water-based lacquer, nitrocellulose lacquer, varnish, oil-based paint, enamel and latex (finish-quality). Standard #3 tip (1mm) is perfect for most fine-finishing of cabinets and furniture.

FUJI MODEL # Q4 pro™ HVLP TURBINE SYSTEM

The Fuji Q4™ system uses the same specially designed turbine case as the Q3™ and it is unbelievably quiet! It has all the features of the Q3™ but with a more powerful 4-stage Ametek-Lamb motor installed. The Fuji Q4™ is designed for paint contractors who spray latex (finish-quality) and heavier paints most of the time. The extra power allows for less thinning of paints. Standard tip is the #4 (1.4mm) for heavier coverage.

ARE YOU A FURNITURE RETAILER OR FURNITURE REFINISHER?

Increase your profits by becoming a Dover Pad distributor!

Help your customers protect their treasured dining tables, servers and buffets

Why sell Dover Pads?

- Increase your profits
- Provide your client with an additional relationship building service
- Low cost
- Very easy to do
- No overhead or carrying costs

Patent # 6,165,577

Your investment is virtually nothing!

- Fabulous New Display/Demo Booklet
- Booklet acts as a selling tool as well as an informational piece for service or retail establishments
- Fully functional, mini-magnetic pad that's built into sample demonstrating how invisible magnets work
- Expanded and larger color chart now displaying 24 color choices (including 6 of the most beautiful leather-tone colors in the industry)

Why your customers NEED a Dover Pad!

- Protects from burns, spills & scratches
- Heat protection up to 600° F
- Spill proof- resistant to humidity
- Cushions sounds – absorbs shock
- Selection of stylish top and bottom colours
- Individual pieces lock together with patented Magna-Lock™ System
- Smooth top prevents crumbs from falling into the seam
- Exclusive solid fibreboard insulation. Lighter weight than other pads
- Can be stored upright or flat
- Designed to give years of dependable protection
- Protection far superior to that of traditional soft pads

It doesn't take much to ruin a beautiful finish...

TOUCH-UP SEMINAR

A must for today's professional refinisher

A two-day intensive seminar devoted to teaching professional techniques in the use of products that repair, finish and touch-up wood and plastic laminates

Key learning benefits to attending this powerful seminar:

- Discover the secrets that only the masters with years of experience know
- Learn the systematic approach to executing fast and faultless repairs.
- Determine which technique should be applied and when.
- Ensure that your work achieves the required result by understanding the principles of burning-in.
- Avoid problems with colour matching, smoothness, graining and sheen.
- Guarantee customer satisfaction and eliminate costly mark-downs.
- Organise your work, leaving adequate time for each step, for corrections, and for unexpected problems.
- Obtain higher quality results in less time and at lower cost.
- Touch-up is also an excellent source of additional revenues.

Who should attend:

Those who repair and/or touch-up damages to wood finishes: furniture manufacturers and retailers, movers, refinishers, restorers of musical instruments, casket manufacturers, delivery personnel, people who need to monitor and improve repair work performed by others, along with personnel from upholstery houses, kitchen-cabinet makers, designers and private craftsmen will also find the course relevant.

Former students attest to the success of this seminar

"We save \$200.00 to \$250.00 per month since attending the Dover Finishing Products Seminar by no longer depending on outside people to do our work. This seminar is beneficial to anyone in helping save time and money."

Jim Walsh
Hammond Keyboards Canada
Toronto, Ontario

"Scratches, nicks and damages on kitchen cabinets used to be a real headache. Not any more. Great work Dover!"

Bernard LaBerge
Kitchen Cabinets and Custom Furniture
Fauquier, Ontario

"Just a note to let you know that this next fellow registered for the touch-up seminar in the winter will be the fifth person (including myself) that we have put through this program over the years. You have helped us reduce our costs and time in claim settlement."

Doug Kellough
Salmon's Transfer Ltd.
Richmond, B.C.

"I forgot certain things over the years and found your seminar very informative in refreshing my memory and introducing new techniques. The pointers on speciality products were terrific."

Irving Hawkes
Lounsbury Co. Ltd.
Moncton, N.B.
